7 May 1956

MEMORANDUM FOR : Project Security Officer
THROUGH : Contracting Officer
SUBJECT : TWX Facilities At Westinghouse

1. It has been brought to my attention that the Westinghouse request to the C & P Telephone for installation of TWX facilities at the Air Arm plant, Friendship, has been returned by the Telephone Company with the notation that a priority would be needed to complete installation before 1 June 1956.

2. Westinghouse will begin flying its radar equipment at Watertown beginning the first week in June. Hence the TWX facilities are necessary for efficient communications between Watertown, Lockheed and Westinghouse.

3. The Project Commo Security Officer has indicated that the Agency Communications Office can apply a priority status to the Westinghouse request. This priority would, however, relate a CIA interest in the Westinghouse installation to a number of Telephone Company employees.

4. It is felt that approval by the Project Security Office should be obtained prior to Commo action.
